

School Districts Get Email Archiving Software for only \$99

Waterford Technologies Shatters the Price Barrier

IRVINE, CA – (PR NEWSWIRE) – Waterford Technologies, Inc., the leader in ease of use email and file archive management solutions, today announced a \$99 special price for its MailMeter Archive software for any K-12 school district. The price covers the software license fee for unlimited mailboxes.

School districts are required by the Federal Rules of Civil Procedure (FRCP), Freedom of Information Act, and state Sunshine Laws to keep relevant electronic information reasonably accessible for e-discovery and public record searches. With budget cuts and insufficient resources, many superintendents have been deflecting requests for email archiving systems from their IT staff. Unfortunately, many school districts have learned that backup tapes don't solve the e-discovery problem when it comes to litigation.

“We felt it was our civic duty to reach out and help the education system,” stated Tom Politowski, President of Waterford Technologies, Inc. “With the drastic budget cuts challenging even the most frugal superintendents, we wanted to make sure that school districts could satisfy their FRCP (Federal Rules for Civil Procedure) needs. The \$99 special price is a huge discount from our normal business pricing. MailMeter Archive is a full functioning solution for unlimited mailboxes and can run on an existing Windows server. No other software solution or hardware appliance comes even close to this low cost investment.

We also published a 16 page business brief, *The 10 Most Dangerous Email Problems Facing School Superintendents*. It discusses these problems frankly and gives suggestions on how to protect themselves and their institutions. We've also published *The 10 Most Dangerous Email Problems Facing Teachers*. This is a MUST READ for every school teacher. Both documents are free and downloadable from our web site, www.MailMeter.com/Education.”

MailMeter supports Microsoft Exchange, Lotus Domino, Ipswitch IMail, and SeattleLab SLMail Pro email servers. It runs on a Windows server. MailMeter has been recognized by industry analysts for its ease of use, quick installation, low resources requirements, and lowest overall cost of ongoing management. Waterford Technologies can be reached at (949) 428-9300.
